RECOMMENDATION

Municipality of Balchik is a dynamically developing municipality, located in northeastern Bulgaria recognized by its traditions not only in commercial and touristic, but also in cultural, educational and public dimensions.

The development of human resources and younger population is not only patronized but it is a major priority for the Municipality of Balchik. That is why the support for teachers and pedagogical experts for professional development is among the specially funded courses of the local administration.

Municipality of Balchik has partnered with Agency OZON since 2018. On the territory of Balchik there are more than 20 educational institutions, 13 of which are already users of the pedagogical supervisions, conducted by Agency OZON. The satisfaction of the educators is underlined; the ongoing sessions are innovative, active and interesting for the participants. A large part of the supervisions are aimed at understanding the children and reveal a different technique of teaching, corresponding to the needs of adolescents.

Agency OZON team is built by exceptional professionals, ready to meet the new and emerging needs of the increasingly diverse educational, public-administrative and social standards. All experts, trainers and consultants approach very professionally and responsibly to their engagements, but at the same time, the conduct of the supervisions is carried out in an interesting and enthralling way. All this leads to a good, professional and quality work done.

As Mayor of Balchik, I express my gratification with the activities of Agency OZON and readiness for future collaboration. I recommend Agency OZON as a reliable and correct partner

Nikolay Angelov

Mayor of Balchik Municipality
